Welcome to the Entrepreneurial Resource Mapping Journey!

This interactive Mural tool is designed to help universities identify, clarify, and optimise the support services available for entrepreneurial activities. It provides a step-by-step approach to clarify the support services available for entrepreneurial activities at your institution and ensure they are effectively categorised, utilised, and communicated across departments and stakeholders. By the end of the journey, you will:

- **Identify and categorise** the resources your university can access (internal and external).
- **Assess** their accessibility and effectiveness.
- **Spot Gaps** where support might be missing.
- **Clarify** who is responsible for each resource.
- **Optimise** how resources can be better used and shared.
- **Communicate** the resource map for better visibility across the institution.

This Mural is divided into seven steps, each guiding you through a specific phase of the journey:

Link to this webpage

Step 1: Identify

Objective: Identify and list all the resources available for entrepreneurial activities at your university (internal and external).
Instructions: Fill up the sticky notes with all the resources that come to your mind, do not limitate. Add more sticky notes if needed,

Financial Resources	Human Resources	Material Resources	Intellectual Resoruces	External Resources
E.g.: government funding, annual budget, investors, etc.	E.g.: specialised departments, professors, etc.	E.g.: dedicated spaces, incubator, etc.	E.g.: entrepreneurship courses, etc.	E.g.: alliances with companies, government funds, etc.

Step 2: Assess

Objective: Evaluate how accessible and used the listed resources are for students, staff, and faculty.
Instructions: Move sticky notes from Step 1 into the relevant categories.

Easy Accessibility	Limited Accessibility	Unknown Accessibility

Step 3: Discover

Objective: Identify missing resources and the resources that are not being used.
Instructions: Reflect on the resources that your institution has and the ones that are missing.

Missing Resources	Resources that are not being used

Step 4: Clarify

Objective: Clarify who manages or oversees each resource and ensure accountability.
Instructions: Identify who and how each of the resources is managed.

Internally Managed	Externally Managed	No clear owner
Resource - Who manages it E.g.: Campus Spaces - Operations Department / Chloe M.	Resource - Who manages it E.g.: Incubator - Local government / Joseph J.	Resource

Step 5: Optimise

Objective: Explore strategies to better use existing resources, obtain missing ones, and clearly assign ownership for more effective entrepreneurial support
Instructions: Brainstorm the ideas and add sticky notes for each idea.

Maximise Existing Resources

- Are there ways to share resources across departments?
- Can we promote underused resources more effectively?
- What resources can increase the impact of entrepreneurship in the institution?

Obtain Missing Resources

- How can the missing resources identified earlier be obtained?
- Are there funding sources we haven't explored?
- What partnerships could help get these resources?

Clarify Resource Ownership

- Who should be responsible for managing the no-owner or newly added resources?
- Is there a need to create clearer documentation for accountability?
- Are there roles missing for effective resource management?

Step 6: Communicate

Objective: Reflect on why and how to communicate them effectively, and how they can contribute to entrepreneurial growth at your university.
Instructions: Identify why it's important to share the mapped resources, how to do it effectively, and how these resources can positively impact entrepreneurial development within the university community..

Why Communicate? (Purpose and Impact)

- Why is it important for the university community to know about these resources?
- What problems could better communication solve?
- How does resource visibility promote entrepreneurial growth?

E.g.: To ensure faculty understand the mentorship programs available.

How to Communicate? (Methods and Channels)

- What are the best ways to share this information across the university?
- Which channels will be most effective?
- What formats would work best? (e.g., visual maps, workshops)

E.g.: Create a digital resource map on the university portal.

How Can These Resources Help Drive Entrepreneurship?

- How do the identified resources directly support entrepreneurial activities?
- What value can these services bring to students, staff, and the university?

E.g.: Innovation grants can fund faculty-driven entrepreneurial initiatives.

Step 7: Monitor

Objective: Establish a process for regularly updating the resource map and ensuring it remains relevant and effective.
Instructions: Plan how to keep the resource map current and useful over time. Consider regular reviews, feedback collection, and responsible teams.

Update Frequency	How often should the resource map be reviewed?
Point of Contact	Who will be responsible for overseeing the updates?
Feedback Collection	How can feedback be gathered to improve the map?
